THIS IS UNEVALUATED INFORMATION SUPP. TO REPORT NO. 25 1. I have read with interest the extract from the British Medical Journal Abnormalities Produced by Drugs. "The author, W Mayer-Gross, MD, FRCP, director of Clinical Research, Crichton Royal, Dumfries, UK, is well 25 18D-25 is a synthetic amide prepared from natural d-lysergic acid and diethylanded. D-lysergic acid is the basic component of the alkaloids of ergot." 19D Mayer-Gross describes the mental reactions following dosages of mescaline, a substance which has been described in medical journals for many years. It is his opinion that the symptoms produced by Isid-25 appear to be close to those produced by macaline despite the wide chemical difference between the two products.
